

Landfill Gas Technician

Employment type: full-time

From its inception in 1991, Weaver Consultants Group has been founded upon the tenets of attentive and responsive customer service, strong project management, and solid internal financial controls. The quality of our people, our focus on understanding and responding to our clients' needs, and our application of good business management practices have resulted in most new projects originating from our existing customer base. Over the years, our professionals have faced the challenges of a constantly changing industry. Shifting federal and state regulations, cultural trends, and technical innovations have vastly impacted the way businesses work. Throughout it all, our team has remained dedicated to our clients, helping to identify pragmatic solutions to help them achieve their business objectives.

Weaver Consultants Group prides itself on our people - A talented group of engineers, scientists, support staff and administrators who are as dedicated to client service as they are to their professional or technical discipline. If you are a motivated and committed individual, please apply to join our growing team!

We are looking for a Landfill Gas Technician who is interested in full time positions working out of the Fort Worth, Texas office.

This position will include field work involving gas system operations, generally local, but some travel and overnight stays including weekends will be required. As our Landfill Gas Technician you will take direction from and work beneath senior level staff. This includes servicing landfill gas flares, pumps, and controls, performing inspections, troubleshooting, monitoring compliance points, writing daily reports, and various other duties as assigned. The ideal person for this position seeks a fast paced, challenging environment, a place to grow and improve skills, and a collaborative environment that is conducive to the development of their personal skills.

Responsibilities:

Monitors LFG well fields

Pump Maintenance

Required to troubleshoot various electrical and mechanical equipment related to LFG systems

Weld HDPE pipe and fittings

Landfill Flare maintenance and troubleshooting

Writes daily reports

Performs various inspections
Performs various maintenance tasks
Understands basic electrical safety requirements
Understands design drawings and layouts
Performs testing and calibration of monitoring equipment
Travel up to 80% is required for this position

Qualifications:

- Bachelor of Science degree in Environmental Science or related field/applicable experience will be considered in place of a 4 year degree
- Exceptional communication skills
- Valid driver's license and excellent driving record required.
- Must be able to lift at least 100 lbs
- Ability to work independently
- Physical requirements of continuous walking, lifting, and bending on project sites
- Work hours could be 10-12 hour days, 5-6 days a week, with compensation for overtime.
